Re: Employer Data for PeachCare for Kids

The following is a preliminary look at the employers of the parents of the PeachCare for Kids enrollees. The counts represent the number of children who have parents who work for the named employer. Since the numbers are at the child-level, if a parent of three works at McDonald's, that one parent will be counted three times in the McDonald's total.

The data represented is based on self-reported information from the PeachCare for Kids application. The number of children supported by self-employed parents may be under-reported, as only parents who stated that they were self-employed on the application were included in the count. There are other employers listed that may be self-employed occupations, such as insurance salesman and nail technician. These were not included since the nature of the employer could not be determined.

Please let me know if you have any questions or if I can provide any additional information.

Employers with 300 or more children enrolled

Self-employed	12,789
Wal-Mart	10,261
Publix	734
Shaw Industries	669
Mohawk	657
Cagle Keystone Food	463
